When you know every single traditional aluminum roller produces so much harmful waste, will you consider using another material?

www.esroll.com
easy@esroll.com

Try using our new eco-friendly composite material roller that has no harmful waste—better for the planet, better for you

Got used to loaders skidding outdoors in the rain? Let our products show you loaders can INDEED have no skidding

weather	Aluminum rollers	Composite rollers	Source
Dry	10.33 (N)	16.66 (N), 61% More friction	Internationally recognized third-party laboratories
Wet	8.00 (N)	18.33 (N), 129% More friction	

150% more **durable** than traditional aluminum rollers

Please request your manufacturer for our rollers on new loaders or contact us for parts replacement
